**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

# **PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to:** Mail **Mail Stop ISSUE FEE**  
**Commissioner for Patents**  
**P.O. Box 1450**  
**Alexandria, Virginia 22313-1450**  
**or Fax** **(571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 669 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 669 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

### **DETAILED ACTION**

1. This communication is in response to the Amendments and Arguments filed on 07/21/2010. Claims 7, 18, 19, 32, 37, and 38 remain pending and have been examined. The Applicants' amendment and remarks have been carefully considered and have overcome the previous rejections. Hence, the case is in condition for allowance.
2. All previous objections and rejections directed to the Applicant's disclosure and claims not discussed in this Office Action have been withdrawn by the Examiner.

### ***Reasons for Allowance***

3. Claims 7, 18, 19, 32, 37, and 38 allowed.
4. The following is an examiner's statement of reasons for allowance:

The closest prior art of record teaches Stevens *et al.* teaches a method of learning with an automatic speech recognition system, the method comprising; detecting a change to dictated text (see col. 26, lines 17-24, and lines 31-39, where the system recognizes an edit or revision); utilizing a computer processor that is a component of a computing device to automatically infer whether the change is a correction, or editing (see col. 26, lines 17-24, and lines 31-39, where the system recognizes an edit or revision); and if the change is inferred to be a correction, selectively learning from the nature of the correction without additional user interaction (see col. 26, lines 31-39, acoustic models are adapted based on user changes and recognition results), wherein selectively learning from the nature of correction includes: a user's pronunciation deviated from an existing pronunciation known by the system by

doing a comparison (see col. 27, lines 1-21, where a comparison of an original acoustic model and a edited acoustic model is compared); determining if the corrected word exists in the user lexicon (see col. 26, lines 52-60, where the best representation of the word is determined for adaptation), selectively changing a parameter associated with the pronunciation (see col. 27, lines 1-21, when the difference is within a threshold then the acoustic model is adapted). However, Stevens does not specifically teach to selectively changing at least one parameter, forced alignment, the two separate determinations, and the confidence score being calculated using the function  $1/[d/f/\log(\text{len } 1 + \text{len } 2)]$ , where d is the distance between the recognized pronunciation and a best match in a lexicon, f is a frequency that the same pronunciation is pronounced, and len1 and len2 are the lengths of phonemes in a new pronunciation and the closest pronunciation.

Honda does teach to selectively change at least one parameter (see col. 7, lines 6-12, where acoustic model adaptation alter parameters such as the average value and variance that defines the transition probability of the HMM). However, Honda does not specifically teach the two separate determinations, forced alignment, and the confidence score being calculated using the function  $1/[d/f/\log(\text{len } 1 + \text{len } 2)]$ , where d is the distance between the recognized pronunciation and a best match in a lexicon, f is a frequency that the same pronunciation is pronounced, and len1 and len2 are the lengths of phonemes in a new pronunciation and the closest pronunciation.

Beaufays et al. does teach the forced alignment of a wave (see page 2594, sect. 2, step 1, where a forced alignment of two waveforms is performed) based on at least

one context word (see page 2574, sect. 2, step 2, where the context is use to determine a region of worst acoustic match and in step 3, alternative pronunciations are suggested). such as the average vale and variance that defines the transition probability of the HMM). However, Beaufays does not specifically teach the two separate determinations, and the confidence score being calculated using the function " $1/[d/f/\log(\text{len } 1 + \text{len}2)]$ ", where d is the distance between the recognized pronunciation and a best match in a lexicon, f is a frequency that the same pronunciation is pronounced, and len1 and len2 are the lengths of phonemes in a new pronunciation and the closest pronunciation.

Nassiff *et al.* teaches a method of learning with an automatic speech recognition system, the method comprising: detecting a change to dictated text (see col. 5, lines 33-40, based on deletion or typing over the words); inferring whether the change is a correction, or editing (see col. 5, lines 33-48, correction or editing is determined based on deletion (editing) or typing over the words (correction.); and wherein inferring whether the change is a correction includes comparing a speech recognition engine score (see col. 6, lines 28-31) of the dictated text and of the changed text (see col. 7, lines 50-62); if the change is inferred to be a correction, selectively learning from the nature of the correction without additional user interaction (see col. 6, lines 45-50), wherein selectively learning from the nature of correction includes determining if the corrected word exists in the user lexicon, selectively learning the pronunciation (see col. 6, lines 45-50, the language model is updated when the replacement word is found on the alternative word list.). Furthermore, Nassiff does teach the determination if a user's

pronunciation deviated from existing pronunciations known by the system by a predetermined statistical quantity and if it is found in the system (see Figure 4).

However, Nassiff does not specifically teach the predetermined statistical quantity being calculated using the function " $1/[d/f/\log(\text{len } 1 + \text{len } 2)]$ ", where  $d$  is the distance between the recognized pronunciation and a best match in a lexicon,  $f$  is a frequency that the same pronunciation is pronounced, and  $\text{len } 1$  and  $\text{len } 2$  are the lengths of phonemes in a new pronunciation and the closest pronunciation.

The present invention's use of the confidence metric enables pronunciation to be selectively added while preventing errors from misalignment, incorrect inferences, and without decreasing system effectiveness (see Applicant's Specification, page 23, last paragraph).

None of the cited reference either alone or in combination thereof teach or suggest the "detecting", "inferring", "learning", "building", and "generating" along with the confidence score being calculated using the function " $1/[d/f/\log(\text{len } 1 + \text{len } 2)]$ ", where  $d$  is the distance between the recognized pronunciation and a best match in a lexicon,  $f$  is a frequency that the same pronunciation is pronounced, and  $\text{len } 1$  and  $\text{len } 2$  are the lengths of phonemes in a new pronunciation and the closest pronunciation, respectively." as recited in claims 7 and 37.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Backfried et al. (US 6,801,893) is cited to disclose adding new words to a vocabulary based on pronunciation.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PARAS SHAH whose telephone number is (571)270-1650. The examiner can normally be reached on MON.-THURS. 7:30a.m.-4:00p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Wozniak can be reached on (571)272-7632. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
